

TRU-PINE[®] for Pets

Canadian Pine Bark Extract Formula

*Remember, your pet
relies on you
to stay healthy!*

Antioxidants are Important for Pets

Antioxidants play an important role in helping to maintain healthy cells in your pet's body. Antioxidants help prevent the action of free radicals, which are the result of exposure to pollutants in the environment. **TRU-PINE[®] for Pets** is one of the most potent sources of antioxidants, which can be added to your pet's diet.

475 Years of Pine Bark History

In 1535, a French explorer named Jacques Cartier spent the winter in Stadacona (Quebec, Canada). Many crew members became ill with scurvy due to severe malnourishment. The Native People of Canada prepared a concoction made from the bark of a pine tree, which helped them restore their health.

After years of research, Canadian scientists have identified the pine tree species used by the Native people of Canada 475 years ago. Today, pine bark is used as an antioxidant to help protect against free radicals.

TRU-PINE[®] for Pets is a blend of several potent antioxidants. The pine bark selected to produce **TRU-PINE[®] for Pets** is harvested from Canada's virgin forests during timber production. The water extraction process retains 95% of OPC's, ensuring the highest possible concentration of antioxidants.

TRU-PINE[®] and **TRU-PINE[®] for Pets** are the only products to source its materials from the same pine trees used in the original concoction by the Native people of Canada.

Canadian Pine Bark Extract Formula

Giving TRU-PINE[®] to Your Pet

The TRU-PINE[®] for Pets capsule formula was made with your pet in mind. The capsules are easy and convenient to take and can be given with a small amount of food or juice to help facilitate consumption. TRU-PINE[®] for Pets is most effective when taken 1 hour before or after meals.

The following chart will give you the suggested daily amounts for your cat or dog in relation to their weight.

WEIGHT	QUANTITY
Up to 25 lbs.	½ capsule daily
Over 25 lbs.	1 capsule daily

CAUTION: For prolonged use consult your veterinarian.

The TRU-PINE[®] for Pets Formula

White Pine Bark Extract (Pinus strobus)

Pine bark contains one of the most potent sources of antioxidants. The antioxidants in pine bark extract are called "OPC's", which are a class of bioflavonoids.

Rose Hips (Rosa canina)

Rose hips contain high levels of antioxidant flavonoids, which are known for their anti-inflammatory and antiallergenic properties.

Vitamin C (Ascorbic acid)

When the bodies of pets are under a particular stress, they may become deficient in vitamin C. An additional source of vitamin C can help maintain healthy levels, which is essential in the protection against oxidative stress.
